District Advancement Plan in Action

Hebron has always had a strong academic intervention program to provide students with additional math and reading support across the grades. This year we launched a new tutoring program using American Recovery Act funding to add another layer of support for our students above and beyond our existing intervention program. Tutors have started working with kindergarten students in reading and phonics and will continue to support more students at GHS and HES as we enter November. We are excited about this new layer of support and the potential for continued growth in our academic intervention program.

Meet the Intervention and Tutoring Team!

GHS (Above): Nikki Craig, Ally Canniff, Paula White, & Jocelyn Anastasiou

Tutoring (Middle): Jessica Lacasse & Ashley LaParre

HES (Below): Julia Clark, Susan Bottaro, Cheryl Ruggiero & Jocelyn Anastasiou

District Advancement Plan Measurement

The State Smarter Balanced Assessments are just one measure we use for our District Advancement Plan. They provide a snapshot of student achievement and show valid and reliable measures of students' progress in required knowledge and skills. **This year our District Reference Group ranking for ELA scores increased from 18th place in 2019 to 9th place in 2021. In Math, Hebron's ranking went from 9th place in 2019 to 5th place in 2021.** The hard work of our students and staff, combined with our investment of resources and recent curriculum adjustments, are resulting in higher student academic performance.
