District Advancement Plan: 5 Year District Technology Advancement Plan

Technology is an important aspect of our teaching and learning plan and is essential to smooth operations. To ensure continued upkeep and support of our competence in the use of technology, Hebron Public Schools has designed a Technology Advancement Plan to serve as a multi-year guide for decision-making. This plan was developed to align with the District Advancement Plan to ensure support of the district's ultimate vision, mission and goals. The plan also ensures that the district's technology keeps pace with advancements in the field of technology. The plan can be found under the district tab of our website, or you [can view it here](#).

Spotlight On: CAPSS Award Winner

We are very pleased to recognize an exceptional 6th grader for the CAPSS Superintendent Award this year, Jaclyn Coffey. Jaclyn embodies the spirit of what the superintendent award stands for, and looks to show those traits everyday. Not only is she an advocate for all, putting the inclusion and joy of others as her number one priority, but she is also a friend of all, going above and beyond to make each and every person she comes across feel welcomed, heard and loved. She gives her all in everything that she

does. Jaclyn is a member of the 6th Grade Student Council, helping to lead that group in community service projects to benefit both our school and the greater community. Jaclyn, we thank you for being such an outstanding school citizen and are so happy to be able to recognize you with this award. Congratulations!
