

Target the Pest, Not the Rest!™

A New bio insecticide from Phyllom BioProducts Corp. that helps protect the quality and value of landscape and recreational turf grasses and ornamental plants with the novel active ingredient, *Bacillus thuringiensis galleriae*. It effectively controls susceptible white grubs (beetle larvae) upon ingestion of the Bt toxin. It is the first Bt insecticide powerful enough to be applied as a spreadable granule against 1st -3rd instar grubs. Yet, grubGONE! demonstrated no adverse risks to non targets tested. grubGONE! is registered for use on landscape and recreational turf grasses and ornamental plants. Potential use sites include golf courses, residential lawns, commercial grounds, parks, athletic fields, pet care facilities, cemeteries, sod farms or interior plantscapes, greenhouses, nurseries, fields, and other turf grass-covered or landscape ornamental-planted areas.

grubGONE! advantages:

- Protects the value of turf landscapes and ornamental plants by effectively controlling susceptible white grubs in the season of application
- Helps manage resistance to chemistries with a new mode of action for IPM programs
- No label restrictions for bees or flowering plants
- grubGONE! and Bt bio insecticides provide a positive public perception
- Shelf life is greater than 2 years when stored as directed

Phyllom BioProducts “Target the Pest, Not the Rest” New bio-insecticides grubGONE!®, beetleGONE!® and boreGONE!® protect the beauty, health and value of forests, farms and landscapes from beetle, weevil and grub attacks without harm to bees and non-targets. Phyllom’s suite of bio-insecticides are protected by issued and pending patents.

Grubs controlled by grubGONE!	
Common Name	Latin Name
Japanese beetle	<i>Popillia japonica</i>
